

Sprint Review Meeting 1

Functional Model:

Absolute perfection

Just space out the models a bit

Object Model:

Attributes were missing the type. e.g (name: String). And the associations/relationships.

Dynamic Model:

1) playSafetyInstructions() instead of watchSafetyInstruction() and requestSafetyInstruction()

2) Everything is correct here.

3) - Rearrange the model a bit.

- Split action number 2 into more actions, otherwise it isn't readable.
- 2.2.a and 2.2.b are same?
